## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a method.

Group II, claim(s) 7-18, drawn to an apparatus.

The invention listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Craig et al. US 5,963,311 teaches an apparatus that comprise a dual path pyrometer, an auto-focus video camera and means for varying the orientation of the optical path as recited in apparatus claims 7, 11 and 15. Therefore, claims 7-18 lack special technical features.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1793

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
